Subject: nuclear waste shipments

1

I would like to voice my concern over the proposal to ship nuclear waste by road and rail through St. Louis County. As a resident who lives in close proximity to both, I am not convinced that the proposal can safeguard my family from harm. While I am sure that your department has spent a lot of time and money into making the shipments as safe as possible, I still maintain that that shipping radioactive material through heavily populated areas is a risk too great to take. Please reconsider this plan.

Sincerely

Janet Modde
